

Gino Bonanno

📍 BC, Canada

An outgoing full-stack web developer who enjoys working on interesting and challenging projects geared towards making people's lives easier, enjoyable, and more connected.

Experience using:

- Ruby on Rails
- JavaScript
- J-Query
- Postgres SQL
- MongoDB
- Command Line
- Git
- Heroku
- Cloudflare
- HTML / CSS
- Tailwind

Limited Experience using:

- React
- Mini test
- Google cloud services
- AWS cloud services
- Bootstrap

Work Experience

Full-Stack Developer

Order Magik • October 2020 — Present

Order Magik is an in-development public Shopify application I am developing for CodeBase.

I am in charge of the front and back end development, well deployment, hosting, marketing, and other business concerns are taken care of by the CodeBase team.

Order Magik is an embedded Shopify app that will be a publically available SAAS application. This application allows users to mass fulfill orders by uploading a CSV file containing the relevant information.

The application was developed using Ruby on Rails 6, MongoDB, SCSS/Tailwind-CSS, Vanilla JavaScript well-making use Shopify-app gem to embed the application inside the Shopify dashboard.

The marketing website is live and can be found at www.ordermagik.com

Full-Stack Developer

Trace Taiwan • June 2020 — Present

Trace Taiwan is my sole proprietorship. As the lone developer, I have taking care of the back end development in Rails 6.0.3.2, well using a PostgreSQL database and a combination of ActiveRecord and Raw SQL queries. Testing has been performed using MiniTest.

On the front end, I have utilized HTML 5, SCSS, Tailwind-CSS, JavaScript and J-Query. For this application have made use of various APIs including Google Maps JavaScript API V3 to implement a custom interactive embedded, and Cloudinary as a CDN for photo delivery including dynamic resizing and formats.

On top of development, I have also been taking care of hosting, securing SSL Certificates, and all other necessary tasks that may require handling. I am also still involved actively in troubling shooting and improving the site.

The site allows users to upload, find, and save information about River Tracing in Taiwan. It is live and can be viewed at www.tracetaiwan.com

Education

Launch School

Full Stack Web Development • 2019 — 2020

Completed over 1500 hours worth of training in the fundamentals of full-stack web development. I choose to study at Launch School because it focused on mastering the fundamentals of software engineering as opposed to a framework. As such, I feel confident in my ability to pick up new technology quickly and to become a productive part of any team.

Gained knowledge and experience in:

- Problem-solving
- Object-Oriented Programming
- Setting up and interacting with databases
- The DOM and DOM manipulation
- Proper code and project structure
- REST and RESTfull APIS
- Working with HTTP/HTTPS

Learned how to implement the above in both Ruby and JavaScript

Thompson Rivers University

Philosophy • 2005 — 2009

- Completed a 4-year bachelors degree majoring in Philosophy where I developed an interest in logical thinking

Recommendations

Andy Nu

Title: Co-founder of CodeBase and project lead for Order Magik

Gino is a solid Ruby on Rails engineer with a great heart and spirit. We worked together at CodeBase on a project where he was responsible for the entire application, contributing both backend and frontend code. I was responsible for the business requirements and app architecture. Beyond his intimate knowledge of the Ruby language, he is a pleasure to work with and brings a broader view to projects than the average engineer. He is patient and an amazing communicator. Gino leads by example and improves the people around him. He is open and helps out whenever he can, a very unselfish person and programmer. I highly recommend Gino as a Ruby on Rails engineer, and he will become an asset on any software team he joins.

Philipp Wegner

Title: Senior Developer with team lead experience/mentor

Starting from our first python program we built in 2018 where I explained and introduced the basics of programming it's astonishing to see how much a dedicated person can achieve in such a short time in a rather complex environment. I wish introducing people to new technologies was always so painless. If you need any additional information feel free to contact me.
